Dear Sir/Madam

Re: *Neanderthals in Plato's Cave: A Relativistic Approach to Cultural Evolution*

authored by George F. Steiner

I have read the manuscript of the proposed book by George Steiner entitled *Neanderthals in Plato's Cave: A Relativistic Approach to Cultural Evolution*, and found it to be an extremely thought provoking piece of work. It is well written, clearly organized and well referenced. The author shows a good grasp of the relevant literature on cultural evolution and prehistory and offers a range of interesting and original ideas on the origin of culture in early humans.

I warmly recommend and endorse the publication of this manuscript.
